71.00 %

TECHNICAL SKILLS

Languages: Python, JAVA, C#, C

Tools and Frameworks: .Net, Visual Studio

Web and Database: JavaScript, ReactJS, HTML, CSS, Bootstrap, PHP, MySQL, MongoDB

Strong Understandings: Data Structure and Algorithms, Problem Solving, Object-Oriented Programming

WORK & EXPERIENCE

Internship at Arrowtech Technology used: Php, HTML, Laravel, MySQL, XAMPP 2023 Aug
Working on **Online Exam Portal** project. It is a web based project where Admin and User Interfaces. Admin can set question paper for the users and can track all the data in real time.

ACADEMIC PROJECTS

Virtual Voice Assistance [GitHub](#) Technology used: Python, Flask, HTML, JavaScript 2023 Jun – Jul

It is a Python-based project of an intelligent assistant. It uses speech recognition to understand commands and responds with synthesized speech. It can perform tasks like weather updates, web searches, music playback and answering GK questions.

Impact: The assistant aims to automating routine tasks and convenience through hands-free voice control Using NLP.

Inward Outward System [GitHub](#) Technology used: C#, MS SQL Server, SAP Crystal Report 2023 Feb – Mar

Developed a desktop-based application for the college to track the letters which are sent and received by the college. User can fetch reports with the help of the SAP Crystal Report.

Impact: A single application to track letters and manage the essential activity (Sent Letters, Received Letters, Reports).

Paint Shop Management [GitHub](#) Technology used: C#, Visual Studio, MS SQL Server 2022 Jan – Mar

Developed a desktop-based application for 'Patel Paints' in which admin can add customer, add company, add product (company wise), add supplier, also comes with a billing system where receipt is generated.

Impact: The main objective of the project is to manage the details of customer registration, product registration, receipt, so it reduces the room for errors as the details were entered manually on paper previously
